Minimal	Low	Moderate	High

Flu Distribution for Ohio				
Light Green	Yellow	Orange	Red	Dark Red
No Activity	Sporadic	Local	Regional	Widespread

Flu activity in Ohio is Moderate for Week 12

The CDC measures flu activity according to 10 flu activity levels classified as: minimal (levels 1-3), low (levels 4-5), moderate (levels 6-7), and high (levels 8-10). The levels correspond the number of standard deviations below, at, or above the mean for the current week compared with the mean for non-influenza season weeks. This is a measure of the severity of flu activity.

Distribution of flu in Ohio is Widespread for Week 12

- No Activity:** No lab-confirmed cases of flu and no reported increase in the number of cases.
- Sporadic:** Small numbers of lab-confirmed flu cases or a single lab confirmed flu outbreak has been reported, but there is no increase in cases.
- Local:** Outbreaks of flu or increases in cases and recent lab-confirmed flu in a single region of Ohio.
- Regional:** Outbreaks of flu or increases in cases and recent lab confirmed flu in at least two but less than half the regions in Ohio with recent lab evidence of flu in those regions.
- Widespread:** Outbreaks of flu or increases in cases and recent lab-confirmed flu in at least half the regions in Ohio with recent lab evidence of flu in the state.
